

ISFD 2025 Pinnacle Awards  
The Elaine Chair  
Calvin Ma

The design of the Elaine chair draws inspiration from the Modernist era while mixing with contemporary trends and finishes. As a result, the Elaine chair appears a relic of decades past while blending in with today's furniture and interior spaces. With a simple silhouette, it can belong in spaces of various styles. Ultimately, it defines a composition quiet and soft, yet grounding and comforting, seeking to bring solace to current times.

The chair looks to simplicity for an elegant design. The metal frame follows a curvilinear path to make up the legs and backrest. The frameless exterior and tilt of the backrest is meant to allow utmost comfort for the user. The frame is available in metal finishes, such as chrome or powder-coated, and can be coordinated with any fabric. The chair is suitable for residential homes, hospitality spaces, and even outdoor venues.
