

MORPHO

DESIGNED BY WENG LAM CHAN, STEPHY

MORPHO

MORPHOLOGY - The study of the forms of things.

Inspired by the Morpho Butterfly, the Morpho Side Table plays with perspective and light, much like the iridescent wings of the Morpho peleides. From a direct view, the table appears sleek and rectangular, while from an angle, its tapered silhouette emerges—creating a dynamic, shifting form. This design mimics the butterfly's dazzling color transformation, where microscopic scales reflect light to reveal varying hues of blue. A fusion of artistry and illusion, the Morpho Side Table is a captivating interplay of structure and perception.
